

# LED Floodlight

## TPFLT Series

Technical brochure

### Small design but large in output

This floodlight with its slimline profile and traditional black housing becomes unobtrusive when not in use. An adjustable trunnion arm allows for the output to be easily directed to achieve the optimum lighting effect.

### Application

This discrete slimline design is suitable for residential and commercial exterior applications. The 4000 K colour temperature produces a warmer light output when compared to traditional floodlights, making them ideal for entertaining areas, entrance, and security spaces.
